*Premium surgical care*

When Maria and Marcello Oviedo from Asunción, Paraguay, were told that their 7 months-old son Dante suffered from Congenital Hyperinsulinism (CHI) they asked themselves: **How can we give our son the best chance for long-lasting health?**

They searched the internet for experienced specialists and found Hyperinsulinism Germany International.

## Why to travel half around the world to Germany?

Hyperinsulinism Germany International means:

- passionate doctors with experience in and dedication to this rare disease
- intense network with close cooperation between specialists in pediatric endocrinology, genetics, PET-CT, surgery and pathology
- outstanding results in cure rates and prevention of diabetes by highly selective surgery
- expertise in international patients, established logistics, support to all intents and purposes: travelling, immigration, visa, accomodation, transport, insurances, financial aspects, language...

Maria's and Marcello's son Dante underwent surgery and got successfully cured. After 14 days he was home again in Paraguay.

„...we are very sure we made the best decision when we picked you as his doctor...!“

*Maria Paz and Marcello Oviedo from Asunción, Paraguay, parents of Dante, 7 months, who was successfully cured*

„...of course it was difficult for us to live in a foreign culture and atmosphere... but we got a warm welcome and there was always somebody here who could help... we even had a translator...“

*Muhammad and Nasra Azbarga from Beer-Sheva, Israel, parents of Rahma, 4 months, who went home cured*

„...my parents couldn't have wished for a better doctor to operate on me...“

*Zeiljka and Igor Krajnovic from Zagreb, Croatia, parents of Lota, 9 month, who got cured by laparoscopy*

„...this surgeon knows what he is doing... we trusted him because he was honest...“

*Regula and Christian Müller from Zug, Switzerland, parents of Cian, 15 months, who got successfully cured*

Prevention of diabetes by highly selective surgery
